

GRI Standards Certified Training Singapore 2019

This GRI-certified training will introduce you to the elements of a good sustainability report and prepare you to report using the GRI Standards.

In partnership with

The Global Reporting Initiative (GRI)'s guidelines are the world's most widely used sustainability reporting disclosures. GRI recently launched the latest evolution of the guideline – the GRI Standards.

In partnership with the National Center for Sustainability Reporting (NCSR), Corporate Citizenship is offering a two-day intensive workshop on the GRI Standard.

GRI STANDARDS TRAINING

Who is it for?

First-time reporters and those seeking to implement the GRI Standards for the first time. This GRI-certified program will introduce you to the elements of a good sustainability report and prepare you to co-ordinate the sustainability reporting process using the GRI Standards.

Dates: 04-05 December, 2019

Time: 0830h-1730h

Venue: TBC

THE TRAINING

Why report in accordance with GRI Standards?

A sustainability report enables a company to communicate its economic, social and governance performance indicators in a systematic and effective manner. It gives the company credibility while engaging with stakeholders, including investors and the general public, and helps identify areas of improvement to manage risk and facilitate change.

The GRI Standards are the latest evolution of the GRI Reporting Framework, the world's most widely used sustainability reporting disclosures.

The focus of the GRI Standards is Materiality – reporting on the most relevant impacts to the organisation and its stakeholders. By identifying and reporting on their

most significant impacts, companies can produce more strategic, focused, credible and user-friendly reports.

Reporting in accordance to SGX's comply-or-explain ruling

The Singapore Exchange (SGX) Sustainability Reporting released its guidelines in June 2016, in which all Singapore-listed companies should prepare an annual sustainability report on a comply-or-explain basis. The GRI framework is recognised in SGX's Practice Note 7.6 as a sustainability reporting framework that Singapore companies could use to report their sustainability policies, practices, performance and targets as required under Listing Rule 711.
